Software developer with 4+ years of experience building web and mobile applications. Specialized in React and React Native, with experience in administrative management, advertising, and multi-client projects. Problem-solving oriented, I build functional products that generate real impact on user experience.

WORK EXPERIENCE

Galilei Smart Solutions — Frontend Developer (React)

Apr 2025 - Present

- **Provided support and maintenance for the company's main project**, refactoring code and implementing new features to improve its performance and scalability.
- **Took part in the end-to-end development of web and mobile projects using React and React Native**, contributing to design, implementation, and production deployment.
- **Integrated AI tools into my workflow to optimize development**, speeding up coding, debugging, and problem-solving.

Pegaso Consulting — Frontend Developer (Angular)

Nov 2023 - Nov 2024

- **Developed and implemented administrative features in the company's main web project using Angular**, improving modularity and enabling efficient adaptation of the system to multiple clients.
- **Designed and integrated REST APIs into the main web ecosystem**, improving frontend-backend communication for fast and reliable data exchange.
- **Optimized system performance by refactoring the code**, reducing component complexity and increasing readability and reusability, accelerating development and maintenance.

APPS2GO — Frontend Developer (Flutter)

Mar 2022 - Jun 2023

- **Developed the foundation of a mobile application in Flutter**, optimized for information management on low-resource devices with real-time response via Firebase.
- **Implemented Firebase as the backend**, managing authentication, storage, and user data to improve project efficiency and scalability.
- **Transformed Figma designs into functional and appealing interfaces using Flutter's full suite of widgets**, ensuring a smooth and intuitive user experience.

EDUCATION

Computer Engineering — Universidad Alejandro de Humboldt

Sept 2016 - Feb 2022

- **Thesis Project:** Development of a mobile application in React Native featuring Text-to-speech functionality.
